THE FORMATION OF THE NEW BCI RECREATION & AQUATICS TEAM

Lexington, KY, May 2025

At Brandstetter Carroll Inc., our mission has always been clear—enhancing communities and improving quality of life through innovative planning and design. Now, we're elevating that commitment with the formation of our new Recreation Team, a dynamic expansion of our expertise in Parks, Recreation, Parks Systems Master Planning, and Aquatics.

At the heart of this initiative is the leadership of Pat Hoagland, ASLA, a trusted industry expert with more than 40 years of experience shaping parks, park systems, and recreation nationwide. Pat has been instrumental in helping communities realize their vision, ensuring that every space we design fosters connection, well-being, and long-term sustainability. As this new team takes shape, Pat is passing on his extensive knowledge before his eventual transition into eventual retirement to Phil Schilffarth, AIA, CID, LEED AP, AFO, a visionary leader who will continue driving our recreation planning and design forward as Recreation Principal. With Phil's passion and expertise, we are expanding our nationwide footprint and reinforcing Brandstetter Carroll Inc.'s position as a leader in community-centered solutions.

In addition to our evolving team, we are also revitalizing our studio space to enhance collaboration and elevate deliverables for our clients. By bringing all of park and recreation our experts into a unified, dynamic workspace, we are fostering a proactive and innovative approach to better serve our clients and communities.

Laying the foundation for this seamless process is Keith Rodenhauer, AICP, GISP, SITES AP, our Senior Planner, who ensures that every community's unique needs are met with thoughtful, forward-thinking solutions.

Charlie Schneider, PE, Principal and Director of Aquatics and Engineering, leads our efforts in designing state-of-the-art aquatic facilities and civil engineering projects, promoting wellness, recreation, and water safety nationwide.

Together, this team brings a comprehensive, community-first approach to parks and recreation planning and design. From crafting visionary Master Plans to designing world-class aquatics facilities, our work is deeply rooted in understanding what makes

communities thrive. We are dedicated to creating spaces that enhance connections, promote well-being, and enrich quality of life for generations to come.
